

Data Dictionary - Global Health Statistics Dataset

This dataset provides comprehensive statistics on global health, focusing on various diseases, treatments, and outcomes. The data spans multiple countries and years, offering valuable insights for health research, epidemiology studies, and machine learning applications. The dataset includes information on the prevalence, incidence, and mortality rates of major diseases, as well as the effectiveness of treatments and the state of healthcare infrastructure.

Dataset Use Cases:

This dataset can be used for:

- Healthcare Policy Analysis:** Understanding which diseases are most prevalent and which countries require more investment in healthcare infrastructure.
- Epidemiological Studies:** Studying the correlation between disease prevalence and socio-economic factors like income, education, and urbanization.
- Machine Learning Models:** Training predictive models to forecast disease trends, mortality rates, and treatment effectiveness based on historical data.
- Global Health Research:** Identifying regions that need targeted interventions or public health campaigns.

Column Name	Data Type	Description
Country	Text	Country where the health data was recorded.
Year	Whole Number	Year of the record (2000–2024).
Disease Name	Text	Name of the reported disease.
Disease Category	Text	Category of the disease.
PrevalenceRate	Decimal	Disease prevalence rate.
IncidenceRate	Decimal	Disease incidence rate.
MortalityRate	Decimal	Disease mortality rate (%).
AgeMin	Whole Number	Minimum affected age.
AgeMax	Whole Number	Maximum affected age.
Gender	Text	Affected gender.
Population Affected	Whole Number	Estimated affected population.
HealthcareAccess	Decimal	Healthcare access percentage.
Doctors per 1000	Decimal	Doctors per 1,000 people.

Hospital Beds per 1000	Decimal	Hospital beds per 1,000 people.
Treatment Type	Text	Treatment used.
AvgTreatmentCost USD	Currency/Decimal	Average treatment cost (USD).
VaccineAvailable	Text/Boolean	Whether a vaccine is available.
RecoveryRate	Decimal	Recovery rate (%).
DALYs	Decimal	Disability-Adjusted Life Years.
Improvement5Yr	Decimal	Five-year improvement indicator.
PerCapitaIncomeUSD	Currency/Decimal	Per-capita income in USD.
UrbanizationRate	Decimal	Urban population percentage.
RecoveryRateFlag	Calculated Text	Derived recovery status.
CostCategory	Calculated Text	Derived treatment cost category.
IsHighRisk	Calculated Text	Derived disease risk classification.
